

About Us

Whether you have problems to solve today or are looking to prevent problems tomorrow, you need the right IT partner – one that provides the support you need, is close by, and can grow with you long term. With our flat monthly fee, you can forget about hourly rates, hidden charges and unpredictable monthly bills. Instead you can focus on your business

Devices

As remote employment continues to increase, the use of personal devices for business purposes has also expanded. Tekrazor understands these employment realities and works to ensure a unified approach to the management of these devices.

Custom Solutions

Create custom applications, reporting, web presence, collection of data, and much more by creating a unique custom application around your business.

Why work with us?

Our Services

Remote Management

Provide instant support. Automation tasks run in the background to ensure your systems are always up to date.

Monitoring

Monitor your systems to ensure that critical applications and system provide warning before issues arise.

Backup and Recovery solution

Manage backups to prepare for those unexpected disasters.

Security

Secure the data and systems to protect your data. Manage and maintain your Anti-Virus software. Protect your network via firewalls. Manage your backups to ensure to protect from any data loss or cyber-attacks.

Outsourced IT Support

Gain the expertise of having your own IT Department. Tekrazor utilize the latest technology to provide remote management for immediate response. Monitoring tools to keep your services and applications running.

Provide alerts and warnings to proactively monitor healthiness of systems and applications.

Let us perform an assessment of your systems. This includes inventory, systems, and network assessments.

We will become your partner to ensure that your business and the technology and systems that you rely on are always maintained, secured, and protected.

Cybersecurity Solutions

Safeguarding your business from cyber threats requires a comprehensive solution that extends beyond data protection.
